

COVID-19 Antibody testing by 173d Military Personnel

The 173d MDG is aware that Sky Lakes Hospital is now offering COVID-19 Antibody testing to anyone who may have been exposed but is currently well and without any active signs of illness. You may elect to have your blood drawn for this test. Sky Lakes is not requiring a signed lab slip from your Primary care Provider. However, you are strongly encouraged to obtain a lab slip from your Provider as the lab results should be conveyed to a Medical Provider for interpretation. Finally, per AFI 48-123 para 11.42, each military member must report any medical procedures, surgeries, lab or imaging results immediately to the MDG.
